# *Eutrochium dubium* 'Little Joe'

## 'Little Joe' Joe-Pye weed

Light Requirements: **sun, part-sun, part-shade**

Soil Moisture: **moist**

Soil Description: **rich, average**

Height: **3'-4'**

Recommended Spacing: **16"-24"**

Bloom Time: **July, August, September**

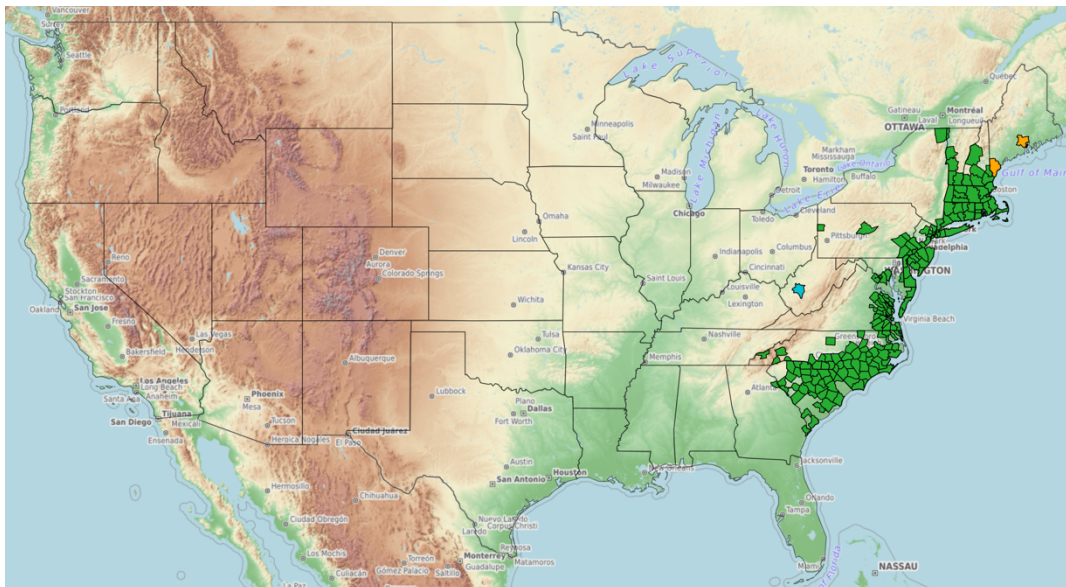

Bloom Color: **purple, pink**

Hardiness Zone: **3, 4, 5, 6, 7, 8**

Additional Tags: **cut flowers, fall interest, pollinator favorite, pond margin plant, stream margin plant**

*Eutrochium dubium* 'Little Joe' is a cultivar that is more compact than the species, typically growing in a clump 3-4' tall and to 1-3' wide. The leaves are whorled, and coarsely serrated. The stems are robust and typically purple. It produces dense clusters of deep-pink to purplish flowers. Both the stems and spent seed heads remain attractive through fall and provide good winter interest.

Although the species prefers consistent moisture, the cultivar is more tolerant of dry conditions. It prefers well-drained soil, but will tolerate some clay. The blooming period lasts for well over a month.
